

# ADRIAN DEWITT

## ICT INTERN

"I was introduced to CAREERS through my off-campus coordinator, interviewed at Arrkann, and landed a position within two weeks. Students should give it a chance because you never know how far it could take you. "

"I learned so much during my internship. My job was to help build an online store, and at the same time, learn everything I could about the parts department. By the end of my placement, I was able to work independently, helping customers online, and in the store. Where the world is going with technology, I feel like there are endless opportunities in this industry. My experience with CAREERS and Arrkaan has helped me realize I want to pursue a career in ICT. Since then, I've been accepted into the Digital Media program at NAIT. I couldn't be more excited about my future."
